# Coyote Dens Near You

Snow is starting to melt and daylight hours are getting longer—a sure sign that Spring is just around the corner.

Coyotes are in the midst of building dens to raise their pups. During this time, they may take advantage of neglected or underutilized areas to establish their Spring den.

Common spots to watch out for include beneath decks, sheds or even beneath dense and untrimmed trees or vegetation planted against houses or fences. To learn more, visit: [edmonton.ca/wildlife/coyotes](http://edmonton.ca/wildlife/coyotes)

## Contaminated Soil Removal In Gallagher Park

A western section of Gallagher Park, in the Ski Club area near the Peace Dove, is temporarily closed while the City completes remediation work near the former incinerator site. The work is expected to be completed by Fall, and will pause for the Folk Fest. The bike/walking path will remain open.

The remediation will include removing contaminated soil and replacing it with 30cm of clean soil and sod. The City reports that the contamination has been

present at the site for decades, but the grass has provided a layer of protection. Replacing it now will ensure safety in the future for park users and city workers. The site was previously a dumping ground for the incinerator, which was active from the 1930s until 1971.

Further information on the park remediation project can be found on the City's website: [edmonton.ca/gallagherparkconceptplan](https://edmonton.ca/gallagherparkconceptplan)
